## About Me

Experienced in 24/7 incident handling, incident management, and critical service monitoring using tools such as Grafana, Zabbix, and Nagios. Skilled in Python, SQL, PHP, ASP.NET, JavaScript, and data processing with SPSS. Proven ability in developing internal applications and Distributor Management Systems to improve operational efficiency. Strong understanding of databases (Oracle, SQL Server, MySQL), service management through ServiceNow, and reporting using Excel (Pivot Tables & Macros). Adaptive, proactive, and continuously exploring new technologies—including AI—to enhance workflow automation and effectiveness. Currently focused on growing toward a Full-Stack Web Developer role.

## Skills

- SQL, Python, PHP, CSS, Javascript, ASP.NET
- Web Developer
- Management Database (MySQL, PostgreSQL, Microsoft SQL Server, Oracle)
- Monitoring System & Aplikasi
- Data Analyst
- Troubleshooting

Feb 2025 | Badan Nasional Sertifikasi Profesi (BNSP)

Competency Certificate in Web Development

Feb 2025 | LKP Syntax Training Center

CAWD Non-Academic Certificate (Web Development)

Jun 2024 | Kaweroo Institute  
Microsoft Excel Intermediate Certificate

## Experience

### PT XLSmart Telecom Sejahtera

#### IT Service Operation

Apr 2025 - Present

I handle and follow up on customer complaint tickets, particularly those related to digital services and transactions. In doing so, I frequently coordinate with cross-functional teams to resolve more complex issues. I also support various internal needs, including network access, domain login, and day-to-day device troubleshooting. Additionally, I prepare daily reports covering incidents, service requests, and the overall speed and effectiveness of ticket resolution.

### PT. Smartfren Telecom Tbk

#### IT Operation Center

Mar 2022 - Apr 2025

manage customer complaints and incidents on a 24/7 basis to ensure rapid resolution and high customer satisfaction. I am responsible for overseeing critical transactions such as Top Up, Vouchers, MDN, and Updates, ensuring smooth operations through consistent daily reporting. I monitor service and server availability using Zabbix and Nagios to maintain system uptime and performance. I also supervise real-time application and network alerts, escalating issues to the relevant teams for immediate action. Additionally, I deliver real-time reports every two hours, providing in-depth analysis to support overall service stability.

### PT. Pratesis

#### B2B Project Lead

Jan 2022 - Mar 2022

Lead the team in implementing the Distributor Management System (DMS) for Distributors, Salesmen, Store Owners, and other stakeholders across Indonesia. I manage UAT and testing for BAU releases and project enhancements, ensuring alignment with client requirements. I coordinate closely with the development team to evaluate and resolve issues in accordance with SLAs. I oversee promotions, coupons, and application-related issues for distributors and store owners. Additionally, I monitor project release implementations and fixes to ensure successful deployment and strong customer satisfaction.

### PT. Pratesis

#### B2B Application Support

Jan 2021 - Dec 2021

Identify and resolve application and system issues through research, debugging, and validation. I support the helpdesk team by handling escalations and coordinating with third-party vendors. I also test, maintain, and monitor applications, including installation and system recovery, to ensure optimal performance.

### PT. Pratesis

#### CC & COMPLAIN MASTER (COSTER)

Apr 2020 - Dec 2020

Identify and resolve application and system issues through research, debugging, and validation. I support the helpdesk team by handling escalations and coordinating with third-party vendors. I also test, maintain, and monitor applications, including installation and system recovery, to ensure optimal performance.

## Education

Bachelor's Degree – Information Technology

PAMULANG UNIVERSITY

2015 - 2019
