PROFESSIONAL SUMMARY

IT Service Operations and Service Assurance professional with 5+ years of experience supporting telecom and enterprise systems in high-availability production environments. Skilled in incident management, production support, SQL/PL/SQL investigation, SLA monitoring, root cause analysis, operational reporting, and internal tools development. Combines hands-on operations experience with application development capability to improve service reliability, investigation speed, and support team productivity.

CORE COMPETENCIES

Operations & Service Assurance: Incident Management, Problem Management, NOC Shift Support, Ticket Lifecycle Management, SLA Monitoring, Service Assurance

Production & Enterprise Support: Application Support, Production Troubleshooting, Root Cause Analysis, Performance Monitoring, Operational Handovers

Database & Analytics: Oracle Database, SQL, PL/SQL, Log Tracing, Data Verification, Operational Reporting

Development & Platforms: ASP.NET Web Forms, C#, JavaScript, REST API, Microsoft IIS, Windows Server, HTML, CSS, Bootstrap, jQuery

Monitoring & Tools: ServiceNow, Zabbix, Nagios, Grafana, Daily Status Reports, Operational Dashboards

PROFESSIONAL EXPERIENCE

IT Service Operation — PT XLSmart Telecom

Apr 2025 – Present

- Support operational continuity of telecom services through production support, SQL investigation, and internal operational tools development.
- Investigate production incidents affecting telecom services, enterprise applications, and service stability.
- Develop and maintain internal support applications using ASP.NET Web Forms, C#, Oracle Database, and Microsoft IIS.
- Build dashboard modules for ticket monitoring, SLA compliance tracking, service assurance workflows, and operational reporting.
- Create SQL and PL/SQL queries for subscriber validation, data verification, reporting, and operational analytics.
- Collaborate with NOC, Service Assurance, IT Operations, business users, and technical teams to drive incident resolution.

IT Operation Center — PT Smartfren Tbk

Mar 2022 – Apr 2025

- Monitored core transaction platforms including top-up services, data voucher activation, and MDN registration processes.
- Investigated alerts from Zabbix, Nagios, and Grafana; created tickets and escalated issues to engineering teams.
- Prepared daily and bi-hourly system health reports to support operational visibility and management review.
- Maintained shift-based monitoring discipline and ensured active incidents were properly tracked across handovers.

B2B Project Lead — PT Pratesis

Jan 2022 – Mar 2022

- Coordinated UAT checks, production validation, release timelines, and post-release support for Distributor Management System environments.
- Aligned developers, external vendors, and operational teams through daily status updates and release readiness tracking.
- Prepared technical support transition notes and system checklists for operational handover.

B2B Application Support — PT Pratesis

Jan 2021 – Dec 2021

- Resolved level-2 application and database issues using SQL queries, log analysis, and structured troubleshooting.
- Escalated application bugs to software suppliers and verified hotfixes in test environments before operational release.
- Maintained internal documentation for recurring database workarounds, recovery steps, and support procedures.

CC & Complain Master (COSTER) — PT Pratesis

Apr 2020 – Dec 2020

- Logged, tracked, and updated customer support cases throughout the ticket lifecycle.
- Monitored case progress to prevent SLA violations and coordinated status updates with technical groups.
- Prepared operational spreadsheets summarizing ticket resolution status, outstanding cases, and daily activity.

SELECTED IMPACT

- **Internal Tools Development:** Built operational applications that simplified ticket investigation, subscriber validation, SLA tracking, and reporting activities.
- **Service Assurance Support:** Supported telecom transaction services through incident investigation, service monitoring, and escalation coordination.
- **Process Improvement:** Consolidated multiple operational checks into centralized dashboards, reducing manual investigation steps for support teams.

CERTIFICATIONS

- Competency Certificate in Web Development — Badan Nasional Sertifikasi Profesi (BNSP), Feb 2025
- CAWD Non-Academic Certificate — Web Development, LKP Syntax Training Center, Feb 2025
- Microsoft Excel Intermediate Certificate — Kaweroo Institute, Jun 2024
